***TEXAS INTERNATIONAL TERMINALS HIRES KENNETH TROTTER AS VICE PRESIDENT OF BUSINESS DEVELOPMENT***

*Executive Brings 25 Years Experience in Terminal Operations and Commercial Development*

**GALVESTON, TX – April 4, 2022** – Texas International Terminals announced the hire of Kenneth Trotter as Vice President of Business Development.

He brings more than 25 years of executive terminal operations and commercial development experience with a focus on the storage and handling of refined products, petrochemicals, and commodities. He has wide-ranging knowledge of terminal mergers and acquisitions, business development, construction, port relationships, government contracts, emergency response, and environmental issues.

“Kenneth’s background and experience offer critical insight into all aspects of the midstream petroleum business,” remarked Bill Bevers, President of Texas International Terminals. “His extensive leadership experience across operations and commercial development will provide valuable problem solving and strategic solutions as the terminal continues to grow.”

Established in 2009, Texas International Terminals is a world-class liquid and dry bulk multi-modal facility for deep-draft vessels, unit trains, manifest rail, barge, and trucking along the Galveston Ship Channel. The company has the capability for liquid transloading and storage, dry bulk handling and storage as well as layberth facilities for all vessels. With the full breadth of terminaling services offered by Texas International Terminals, our single location links North America with the global market. Today, the terminal serves some of the largest ethanol producers, phosphate producers, and agri-businesses in the world.
